

leave xm radio alone.I am a truck driver who uses xm for traffic reports,weather reports instantly. I dont have time for local stations to give reports. The department of transportation only gives me so many hours in a day to work so i cant afford to sit and wait. With xm i am not continually hunting for something to listen to when traveling across country.As you know there are many blank spots in this great country of ours where you just cant get a signal.So please leave my best traveling buddy alone.
